SUMMARY

Full-stack engineer with 1.5+ years of freelance and startup experience building production-ready web and mobile applications using Next.js, React, Node.js, and React Native. Delivered 7+ real-world products end-to-end, improved performance and engagement metrics, and led full-stack development for early-stage startups. Experienced in AI/ML integrations and rapid product iteration in remote teams.

EDUCATION

- MCT's Rajiv Gandhi Institute of Technology** Mumbai, India
Bachelor of Engineering - Computer Engineering; GPA: 7.6 November 2022 - May 2026 (Expected)

SKILLS SUMMARY

- Languages:** Java, C, JavaScript, C++, Python
- Frontend:** React.js, Next.js, React Native
- Backend:** Node.js, Express.js
- Databases:** MongoDB, Supabase
- Tools:** Git, GitHub, VS Code, Figma, Expo

ACHIEVEMENTS

- 1st Place Winner – Smart India Hackathon 2024**, India's largest hackathon (among 50,000+ participating teams nationwide)
- 2nd Runner Up – Hack4Change Hackathon by Google and Charcha** (competed against 6,000+ teams nationwide)
- 2nd Runner Up – Code4AI** at Rajiv Gandhi Institute of Technology

PROFESSIONAL EXPERIENCE

- Epic Bite** Contract
Full-Stack Developer September 2024 - November 2024
 - Content Platform Development:** Built a complete content-driven platform (web + mobile) for a food creator using Next.js, React Native, and Supabase.
 - Content Management Workflow:** Designed scalable content management workflows, reducing publishing time by 40%.
 - UI/UX Optimization:** Improved content accessibility and engagement by 30% through responsive UI design.
- Adzeeny** Remote
Full-Stack Developer August 2024 - February 2025
 - Digital Product Development:** Developed 5+ production-ready digital products and a fully responsive website, enhancing brand presence and client engagement.
 - End-to-End Full-Stack Ownership:** Led full-stack development to deliver scalable solutions aligned with business goals.
 - Performance & UX Optimization:** Contributed to a 20–35% improvement in overall user experience and conversion readiness through UI and performance enhancements.

PERSONAL PROJECTS

- VeriSure - AI-Powered Document Verification System** GitHub
Next.js, Node.js, MongoDB, TensorFlow, Pytesseract November 2024 - December 2024
 - AI-Powered Document Verification:** Developed an AI-powered document verification system using OCR and deep learning, achieving 99% accuracy and reducing manual verification time by 80%.
 - OCR Text Extraction:** Implemented Pytesseract for OCR to extract text from documents with 95% accuracy.
 - Fraud Detection Model:** Trained a CNN to detect fraudulent or tampered documents for real-time verification.
 - Verification Pipeline Optimization:** Compared extracted text with predefined templates to enable real-time verification and reduce processing time to seconds.
- ODOP - One District One Product** Youtube
React Native, Hyperledger Blockchain, Django July 2024 - August 2024
 - ODOP Platform & Impact:** Developed an application for the ODOP scheme, increasing local artisans' income by 60% through workshops, job portals, machinery rentals, and a global community platform.
 - Mobile Application & Authenticity:** Built a cross-platform React Native mobile app with 99.9% uptime and integrated a private blockchain (Hyperledger Fabric) to ensure product authenticity and transparency.
 - AI & Backend Systems:** Implemented AI-driven recommendation systems, sales prediction models, and user segmentation, and built a secure, scalable backend using Django to improve engagement by 60%.

VOLUNTEER EXPERIENCE

- President at Computer Engineering Student's Society, RGIT** Mumbai, India
Organized technical events and conducted hands-on workshops for students. July 2025 - Present
