SUMMARY

AI Engineer and Full-Stack Developer with 2+ years of experience building AI systems and scalable applications. Delivered 10+ production-ready applications and developed solutions using LLMs, NLP, and RAG architectures. Two-time national hackathon winner, including 1st Place at Smart India Hackathon 2024.

PROFESSIONAL EXPERIENCE

- Sunrisers Hyderabad** Website Contract
Full-Stack Developer February 2026 - April 2026
 - Built the official **Sunrisers Hyderabad** website using **Next.js** and **React**, delivering a fully responsive experience for millions of IPL fans while implementing pixel-perfect UI from Figma designs.
 - Integrated **real-time match data APIs** handling **600,000+ requests/hour** during live games with **zero downtime**, while optimising **Core Web Vitals** through code splitting, image optimisation, and lazy loading.
- Epic Bite** Contract
Full-Stack Developer September 2025 - November 2025
 - Architected and delivered a **content-driven web and mobile platform** using **Next.js**, **React Native**, and **Supabase**, streamlining content management workflows and **reducing publishing time by 40%**.
 - Improved content accessibility and audience engagement by **30%** through responsive UI redesign, performance optimisation, and scalable content delivery.

PERSONAL PROJECTS

- AI Codebase Intelligence Platform** GitHub
Next.js, TypeScript, Anthropic Claude, Pinecone, RAG May 2026
 - Built an AI-powered code intelligence platform that indexes **Github repositories (500+ files)**, generates **architecture wikis**, and answers developer queries with file-level citations using **Claude**, **Vercel AI SDK**, **Pinecone**, and **hybrid RAG (vector search + BM25)**.
 - Implemented dependency-impact analysis using static import graphs for risk-aware code change assessment, alongside streaming AI responses, **conversation memory**, **chunk-level retrieval scoring traces**, and **automatic local vector-store fallback**.
- VeriSure - AI-Powered Document Verification System** GitHub
Next.js, Node.js, MongoDB, TensorFlow, Pytesseract November 2024 - December 2024
 - Built an AI-powered document verification pipeline using **OCR (Pytesseract)** and a **CNN model**, achieving **99% verification accuracy** while reducing manual review effort by **80%**.
 - Implemented real-time fraud detection by validating **OCR-extracted data** against document templates, enabling **sub-3-second processing** through a full-stack document upload and review system with audit tracking.

SKILLS SUMMARY

- Languages** Python, JavaScript, Java, C, C++
- AI/ML** LLMs, AI Agents, LangChain, LangGraph, RAG, Pinecone, Prompt Engineering, Hugging Face, TensorFlow, PyTorch, Scikit-learn, CNNs
- Full Stack Development** React.js, Next.js, React Native, Node.js, Express.js, FastAPI, REST APIs
- Databases & Cloud** MongoDB, PostgreSQL, Supabase, Redis, AWS (S3, Lambda, EC2), GCP, Vercel, Docker
- Tools** OpenAI API, Anthropic API, Ollama, Pytesseract, Git, GitHub, Cursor, VS Code, Figma, Expo

ACHIEVEMENTS

- 1st Place Winner – Smart India Hackathon 2024**, India's largest hackathon (50,000+ teams nationwide)
- 2nd Runner-Up – Hack4Change Hackathon by Google and Charcha** (6,000+ teams nationwide)
- 2nd Runner-Up – Code4AI** at Rajiv Gandhi Institute of Technology

PUBLICATIONS

- BrainSync: An AI-Powered Unified Platform for Collaborative Learning and Intelligent Coding Workspace in Higher Education** Paper Link
Published in *International Journal of Novel Research and Development (IJNRD)*, 2026

EDUCATION

- MCT's Rajiv Gandhi Institute of Technology** Mumbai, India
Bachelor of Engineering - Computer Engineering GPA - 7.6 November 2022 - May 2026 (Expected)

VOLUNTEER EXPERIENCE

- President at Computer Engineering Student's Society, RGIT** Mumbai, India
Led a 90+ member team to organize 10+ technical events and a national level hackathon. July 2025 - May 2026
